Next Review Date: 2019

College	Course Name	Course Prefix	Course Number	Course Credits
Saint Paul College	Introduction to Automotive Technology	AUTO	1415	3 of 4

This course covers industry safety practices, service manuals and technical bulletins, communication skills, and the use of measuring instruments. Also covers automotive terminology and introductory automotive maintenance procedures.

Curriculum Content Objectives:

To receive credit, students will master 100% of the following content objectives:

1. Practice industry safety standards.
2. Demonstrate the use of assigned measuring instruments.
3. Use proper torque methods when repairing vehicles.
4. Locate vehicle information and specifications within service manuals and service information to diagnose and repair vehicles.
5. Perform inspection procedures on a variety of automobiles.
6. Complete repair orders thoroughly and accurately.
7. Perform preventative maintenance procedures.
8. Perform tire repair, replacement, and balancing procedures.

Assessments:

Students must achieve no less than 80% or B for a final grade in the high school course to receive ACC.

ACC Concept:

Skills for selected courses, required for graduation in programs at the colleges participating in this regional agreement are taught in our schools using the assessments developed collaboratively by secondary and post-secondary staff. High School credit is earned and college credits are earned if the student meets the college achievement.
